"Judit Galambos worked in my Staffing Project Team based in Budapest during 2008. The purpose was to hire 115

technical helpdesk employees with a range of 9 native languages into to the new Customer Call Centre we were establishing. We had many challenges to overcome in a very short time frame which included limited relocation resources which required the Consultants to use all their recruitment expertise, creativity and innovation to source these candidates in Budapest. The team was small which meant each Consultant's productivity was highly visible to the business.

Judit was a valued member of the team and she displayed particularly strong networking capabilities to source candidates. This resulted in Judit sourcing applicants who had the level of technical expertise we required with most difficult to find native language capability. These individuals were to support our external customers. Judit took the challenges, identified where solutions could be found and pursued these. These activities included and were not limited to identifying, setting up and working through specialist job boards (Eastern Europe), working with the local media and owning the relationships, attending networking events or contacting local embassies to establish partnerships. Judit is an experienced, capable recruiter who understands what competencies are required to be a strong recruiter and can deliver against these.

Judit maintained her focus throughout the challenging periods and her drive to meet our timelines did not waver."
